| ×  | Disinfector status                |                       | It shows if person had applied a disinfector                                  |  |  |  |  |
| ×  | Allowance s                       | status                | It shows if person has a fever and if he wears a facemask                     |  |  |  |  |
| ×  | ]Card reader                      |                       | It shows if the use of entry card is needed and the user's level of access    |  |  |  |  |
| ×  | KILCONTIRMATION STATUS            |                       | It shows if the receptionist had left you in and the person's level of access |  |  |  |  |
| ×  | 🗙 Enter status                    |                       | It shows if person should enter or exit                                       |  |  |  |  |

#### ×

This is the gate status overview.

| G | Gate status overview  |   |  |  |  |  |  |
|---|---|---|--|--|--|--|--|
| 1 | 1Door sensorsIt TOF sensor detects person, the entrance arrow light (right) turns on for the<br>people coming in, or the exit arrow light (left) turns on for the people going of |   |  |  |  |  |  |
| 2 | Semaphore status  | If both red and green light are turned on, the entrance conditions must be met<br>(card, face sensor, disinfector,), if the green light is turned on you can enter,<br>if the red light is turn on you can't enter. If the semaphore beeper is turned on<br>along with a red light, the person must exit the building immediately. Beeper<br>can be disabled on the System setup menu or it can be set that it resets when<br>the person exits the building |  |  |  |  |  |
| 3 | 3 Gate status It shows if gates are closed or open. Smart Gate system works with all kind o gates: normal, revolving door, sliding door, airport metal detector                   |   |  |  |  |  |  |
| 4 | 4 Presence status It shows if the presence sensor has been triggered  |   |  |  |  |  |  |

| 5 Thermo and mask camera status | It shows if person has a fever and if he wears a face mask. It can be set, in the<br>System setup menu, on permission mode, which means the doors are closed<br>and they open if you pass the temperature and mask condition (among the<br>others). Or it can be set on prevention mode, which means the doors are open,<br>but they close if you don't pass that condition |  |  |  |  |  |  |
|---------------------------------|---|--|--|--|--|--|--|
| 6 Disinfector status            | It shows if a person applied disinfector  |  |  |  |  |  |  |
| 7 Code reader                   | It shows the status of access   |  |  |  |  |  |  |
| Configuration                   | Configuration   |  |  |  |  |  |  |
| Set count                       | Set count for total number of people counted in space   |  |  |  |  |  |  |
| Confirm L1                      | If the condition for L1 access are met, the button will become enabled  |  |  |  |  |  |  |
| Confirm L2                      | If the condition for L2 access are met, the button will become enabled  |  |  |  |  |  |  |
| Reset alarm                     | Resets alarm  |  |  |  |  |  |  |
| Gate auto/gate<br>opened        | Switches between gates opening automatically with security measures or<br>opening manually. When they can be opened manually it usually means it's<br>because of emergency and everyone must leave the building immediately   |  |  |  |  |  |  |

# ACCESS SETTINGS

On this menu, the code and access status can be added.

×

| Configur   | Configuration  |  |  |  |  |
|--|--|--|--|--|--|
| Edit code  | Manually input new user's code, alternatively you can scan it with the card scanner                      |  |  |  |  |
| Туре   | Set user level of access, which are L1 for normal users, L2 for VIPs and UL unlimited access (employees) |  |  |  |  |
| Code list  | ode list All the users are saved here, choose user to edit it's code and type, holds up 100 users        |  |  |  |  |
| Search Checks the code list for desired code, which is inputted in the edit code sec<br>The code number and type are then returned |  |  |  |  |  |
| Save Saves the created edit code   |  |  |  |  |  |
| Clear  | Clears the edit code and type  |  |  |  |  |
| Delete   | Deletes the code from the code list  |  |  |  |  |

## SYSTEM SETUP

When the system is connected and turned on, the technician sets these settings.

×

| Configuration     |   |  |  |  |  |  |
|-------------------|---|--|--|--|--|--|
| Limit 1           | This is the limit for normal access, everyone can enter. After this limit is reached, only VIPs and employees can enter (no more L1 access) |  |  |  |  |  |
| Limit 2           | This is the limit for VIP access, L2 and UL can enter. After this limit is reached, only employees can enter (UL access only)               |  |  |  |  |  |
| Counting type     | Choose if the counting of people is with digital IO or communication  |  |  |  |  |  |
| Presence time-out | Set how long the presence sensor is active after detecting someone  |  |  |  |  |  |

http://wiki.hiq-universe.com/

| Entry gate time-c  | out  | Set how long the entry doors are open after the TOF sensor has detected someone   |  |  |  |
|--|--|---|--|--|--|
|  |  | Set how long the exit doors are open after the TOF sensor has detected someone  |  |  |  |
| Alarm duration   |  | Sets duration time of the alarm   |  |  |  |
| Alarm beeper<br>enabled  |  | Enable or disable alarm beeper  |  |  |  |
| Reset alarm on e   | xit  | Enable or disable the reset of alarm on exit  |  |  |  |
| allowance cond   | litio  | t have to be met if everything is enabled: disinfection and<br>n must be met and then just one of other two conditions<br>means either reader or confirmation condition |  |  |  |
| Disinfection   |  | Sets if disinfection is necessary for user's level of access, sets time-out that triggers after check   |  |  |  |
| Allowance  |  | Sets if face mask and temperature check is necessary for<br>user's level of access, sets time-out that triggers after check   |  |  |  |
| Reader   |  | Sets if scanning card on the reader is necessary for user's level of access, sets time-out that triggers after check  |  |  |  |
| Confirmation   |  | Sets if receptionist confirmation is necessary for user's level of access, sets time-out that triggers after check  |  |  |  |
| Allowance type   |  | If set on permission, door opens when user is clear to enter<br>after ok allowance check, if set on prevention, door closes<br>when users fails allowance check         |  |  |  |
| Internet access  | 5  |   |  |  |  |
| Enable push to<br>server   |  | ble connection to the cloud server (allow controller to send odical push message to server) every 30 seconds  |  |  |  |
| Test   |  | end push message instantly  |  |  |  |
| Reset  |  | Reset number of sent messages   |  |  |  |
| Push timer   |  | Shows countdown after which the push message will be sent   |  |  |  |
| Messages   |  | nber of all sent messages and number of successfully sent<br>ssages   |  |  |  |
| Roundtrip  |  | me it takes the message to get to server and the response to ome back   |  |  |  |
| Master code<br>Master |  |   |  |  |  |
| Send LAN code<br>query If scanned code is not on the code list for that device, a query will b<br>device, that the code is on it's list, access is granted   |  |   |  |  |  |
| Process LAN<br>code query  | Enable to process code query and send back answer  |   |  |  |  |
| LAN query<br>timeout   | Set query timeout. If the device that sent query doesn't get answer in set time, it refuses access |   |  |  |  |
| Autodetect It searches for other controllers in the network and opens a menu with found controllers. If the other controller is chosen, you manage this one  |  |   |  |  |  |
| Parameters cor   | nfigu  | uration   |  |  |  |
| Init parameters  | Set  | parameters to the ones saved in permanent memory  |  |  |  |
|  |  |   |  |  |  |

| Save parameters | Save set configuration to the permanent memory   |
|-----------------|--|
| Pood parameters | Save set configuration to the permanent memory<br>Read parameters from the permanent memory and write them to work<br>parameters |
|                 | parameters   |

### **DISPLAY SETTINGS**

| Exit     | Set the text that will be displayed if the person has to exit the building           |  |  |  |

### **CONFIGURATION EXAMPLES FOR DIFFERENT USES**

-This configuration is useful when for example there's two entrances. One is for normal access, doors are open and everyone can enter without having to met any conditions. But the other is for VIPs only. Swiping L2 card or receptionist's confirmation is required to enter (e.g. stadium entrance for VIP lounges).

-This configuration is useful when for example you have one entrance for everyone, no code is required to enter, but all who enters have to apply disinfector and perform a face scan (e.g. when there's a danger to get infected or to infect others, like in a hospital).

|   | L1                 | L2                 | Time-out | S        | tatus |   |
|---|--------------------|--------------------|----------|----------|-------|---|
| Disinfection                                | $\bigtriangledown$ | $\bigtriangledown$ | 60 s     | $\times$ | 60.0  | S |
| Allowance                                   | $\bigtriangledown$ | $\bigtriangledown$ | 60 s     | $\times$ | 60.0  | S |
| Reader                                      | $\boxtimes$        | $\boxtimes$        | 60 s     | $\times$ | 60.0  | S |
| Confirmation                                | $\boxtimes$        | $\boxtimes$        | 60 s     | $\times$ | 60.0  | S |
| Allowance type:<br>permission<br>prevention |                    |                    |          |          |       |   |

2025/07/06 15:51

-This configuration is useful when for example there's two entrances, one entrance for normal access, but people who enter have to apply disinfector and perform a face scan. The other entrance is for VIP's, they have to swipe the card or get receptionist's confirmation to enter (e.g. on a airport where there's a main entrance for everyone who have to go through security measures to get on a plane and another entrance for people with private planes).

Last update: 2020/06/24 13:17

-This configuration is useful when for example there's just one entrance for everyone, but you are alone in the place where you're entering so you don't have to wear mask, but you can't be contagious so the people who enter behind you don't catch a disease (e.g. public toilet in a supermarket or sleeping pod in the airport).

Last update: 2020/06/24 13:17

-This configuration is useful when for example there's two entrances with different level of security. For less secure entrance just a card is needed to enter, but for more secure entrance card can't be used in case it's stolen, so only receptionist can let you in (e.g. bank's vaults).

| G 45 Configurator vt 1.0            | - D X  |
|-------------------------------------|--|
|                                     | Crobotina  |
| Limit 1: 10                         |  |
| Limit 2: 20                         |  |
| Counting type:                      |  |
| (igital 10)                         | Internet access  |
| Communication                       | Desable push to server   |
| Presence time-out: 10 s (10,0 s)    | Test Reset   |
| Entry gate time-out: 5 s ( 5.0 s)   | push timer: 2 s  |
| Exit gate time-out: 5 s ( 5,0 s)    | messages: 2822 / 2822  |
| Alarm duration: 10 s                | roundtrip: 110 ms  |
| alarm beeper enabled                | Ϋ́́́́́   |
| 🖉 reset alarm on exit               |  |
|                                     | Paster code: 0000001990  |
| L1 L2 Time-out Status               | S send LAN code querry and grant and |
| Disinfection 🖾 🐱 s 🐱 60,0 s         | (a) process LAN code querry  |
| Allowance 🖸 🖸 😝 s 🖾 60,0 s          | LAN query timeout: 500 ms  |
| Reader 🛛 🖸 🐽 s 🖂 60,0 s             |  |
| Confirmation 🗵 🕗 🐽 » 🖄 60,0 »       | Autodetect   |
| Allowance type:                     | Independence I   |
| permission                          | c30506 300   |
| O prevention                        |  |
|                                     |  |
| init parameters save parameters rea | d parameters   |
|                                     |  |
|                                     |  |

-This configuration is useful when for example there's just one entrance that is always open because allowance type is set on prevention. Only condition for entering is that face scan has to be performed. If someone enters without scanning or the fever is detected, entrance closes (e.g school's entrance).
