HEMS G2 Configurator

hems_configurator_v1.0.4.exe

home

Basic system overview.

1. Grid				
>	From grid	Tariff (LO, HI, D-LO, D-HI) and power from grid in W		
		Imported energy by tariff in Wh		
,	To grid	Power exported to grid in W		
		Exported energy in Wh		
2. Plants				
<	Produced	rced Produced power in W and energy in Wh		
>	Consumed	Consumed power in W and energy in Wh		
3. Storage systems				
<	Sourced	Power in W and energy in Wh sourced from storage (battery)		
>	Stored	Power in W and energy in Wh stored (to battery)		
bargraph and %1	SOC	Battery State Of Charge		
4. Consumers				
>	Consumed Consumed power in W and energy in Wh			

⁻ http://wiki.hiq-universe.com/

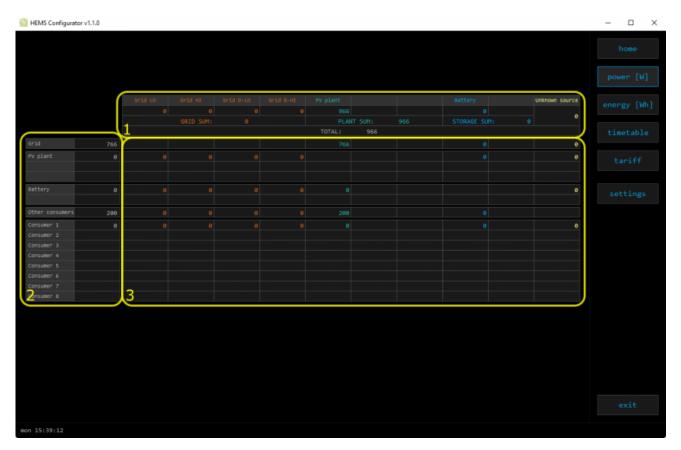

[1	Status	atus Output status for managed consumers		
LJ	Status	output status for managed consumers		
bargraph ²	Analog out	g out Analog output value		
click	Toggle	Click in frame toggles managed consumers output		
long-press ²	Set analog	alog Long press on first consumer pops-up dialog for analog value set		
5. Unknown source				
>	Sourced	Power in W and energy in Wh from unknown source		
Accumulate also all differences caused by power-sensor inaccuracy				
6. Other consumers				
>	Consumed	Consumed power in W and energy in Wh by other (not measured) consumers		

¹ only for eStore

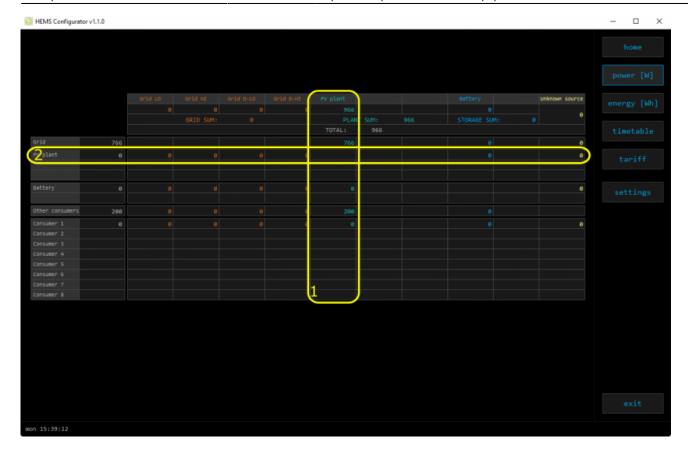

² only for first managed consumer

power

Overview of current power distribution by source / consumer.

1. Sourced power Sourced power for each source Sums per source type Total of all sourced power 2. Consumed power Power for each consumer 3. Power distribution Partial distributed power

1. Sourced power distribution

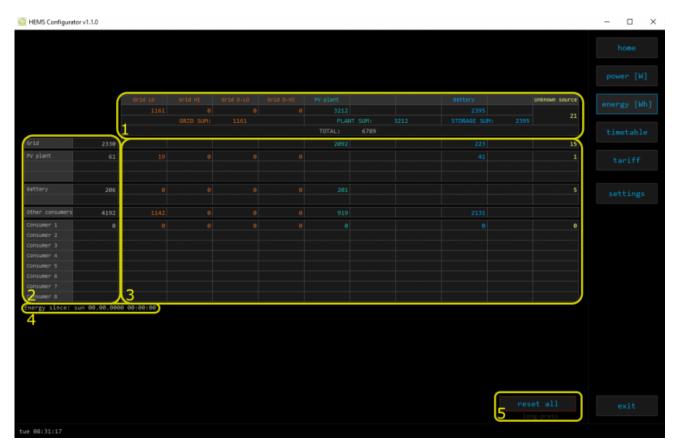

How sourced power is consumed by each consumer

2. Consumed power distribution

Who sources consumed power

energy

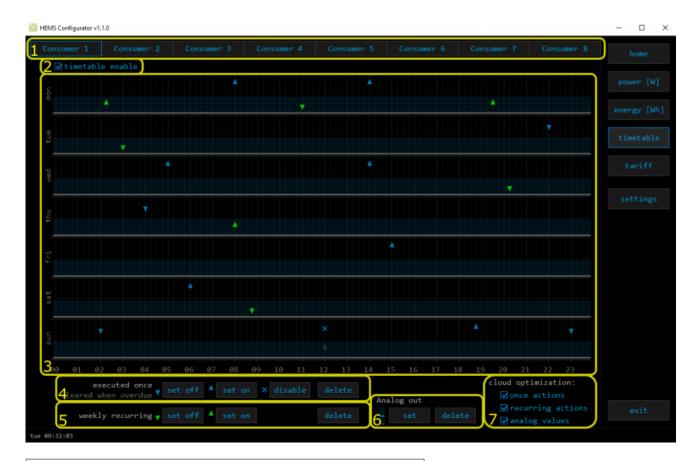

Energy overview of a given time distributed by sources / consumers.

1. Sourced energy		
Sourced energy for each source		
Sums per source type		
Total of all sourced energy		
2. Consumed energy		
Energy for each consumer		
3. Energy distribution		
Partial distributed energy		
4. Energy since		
Date and time since energy is recorded		
5. Reset all		
Long-press to reset all energy counters		

timetable

Weekly timetable for managed consumers.

1. Managed load menu

Switch between managed loads

2. Enable checkbox

When un-checked timetable is not executed

3. Events grid

Events displayed in weekly grid (15 min resolution)

Click to select time and set event by clicking buttons below

4. Once actions (top priority timetable actions)

Actions are executed and then automatically cleared.

"Disable" action will just disable recurring action.

5. Recurring actions (low priority actions)

Actions are executed each week.

6. Analog out

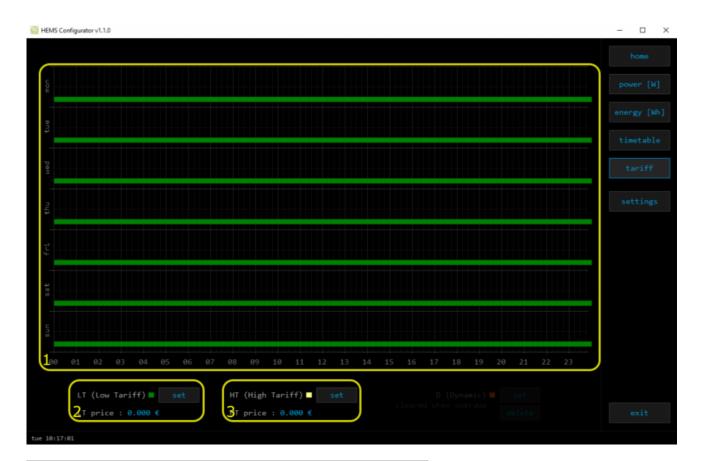

Action to set analog output. Analog actions are recurring.

7. Cloud optimization

When enabled (checked) cloud optimization is enabled.

tariff

Weekly tariff timetable for grid energy per tariff distribution.

1. Tariff grid

Graphical weekly timetable with tariffs.

Click to select term, click-and-drag to select multiple terms.

2. Low tariff

Set low tariff for selected terms.

3. High tariff

Set high tariff for selected terms.

settings

Easy and intuitive system setup.

1. System settings					
[autodetect]		Click to find HEMS G2 in local network			
eStore	c	eStore serial number (automatically detected or can be entered manually).			
	[] enable	When checked HEMS will read Grid, first plant and first Storage directly from eStore (so there is no need to duplicate power-sensor).			
	[detect]	eStore address is cleared and new eStore can be detected.			
	c	HIQ Home serial number (automatically detected or can be entered manually).			
HIQ Home	[] enable	When checked HEMS will read Grid power and energy from HIQ Home (so there is no need to duplicate power-sensor).			
	[detect]	HIQ Home address is cleared so new can be detected.			
2. Internet access					
[] enable	When checked HEMS is automatically connected to HIQ Universe cloud service. Connection is initialized by HEMS system and uses UDP packets on port 8442.				
[test]	New "push" message is sent to server and roundtrip time is rechecked.				
[reset]	Clear messages counts and roundtrip time				
push timer	Timer in s for send "push" message to server				

messages	Sent "push" mes	sages / responses counters			
roundtrip	Time in ms between sent push message and response.				
3. Sources and Cons	umers settings	table			
SOURCES	source name				
icon	source icon				
	source power-sensor management				
	message	messages regarding source power-sensor			
source management	add	associate new power-sensor to source			
	del	disassociate power-sensor from source & configure it as new power-sensor			
meter	source power-sensor type				
meter	in/ex	power plant connected ¹			
new device	power-sensor configured as new one detected or wireless module configuration ²				
Wireless setting	setting up wireless modules				
CONSUMERS	consumer name				
icon	consumer icon				
	consumer meter and output management				
	message	messages regarding consumer meter and output			
consumer management	add	associate new power-sensor or new wireless module ² to consumer			
aagea.	del	disassociate power-sensor or wireless module ² from consumer & configure it as new power-sensor or new wireless module ²			
meter	consumer meter	type			
autnut	consumer output type				
output	<<·>>	setting repeater mode ²			
man. time	manged consumer manual override timer				
out mode	manged consum	er output mode (normal or inverted)			
timetable	manged consum	er timetable execution enabled			
4. Permanent memor	ry parameters				
[init parameters]	init all parameters to default value				
[save parameters]	save all paramet	ers to permanent memory			
[read parameters]	read all parameters from permanent memory				
[] autosave parameters	parameters will be automatically saved to permanent memory in 15 minutes after last parameter change				
5. Backup / Restore t	to PC				
[backup]	backup all parameters to PC				
[restore]	restore all parameters from PC backup				

 $^{^{\}scriptscriptstyle 1}$ only for the first power plant

² wireless setting must be enabled
