

# HIQ UNIVERSE - Service provider

Accounts with access level of service provider have additional fields available:

- Instance manager
- Data API account manager
- Fleet manager

## Side menu

Side menu is activated by clicking menu icon (three horizontal lines at top-left). Menu items are dynamically created so they can be different for each service provider:

- **Home page** → section with all your subscribed HIQ Universe devices and services
- **TOOLS** → section with general site tools
  - Profile
  - Instance manager → ["Overview of installed systems"](#)
  - Reports
  - Data API account manager → ["API key management"](#)
  - Fleet manager → ["Aggregation and overview of service providers installed systems"](#)
  - Sign out

Table shows all installed systems by the service provider and their additional info:

- Name
- Type
- Users
- Status

Clicking on the instance name will take you to instance home page as seen by end users. Clicking on the plus sign displays additional instance info:

- **Basic details**
- **User's details**

The screenshot shows the 'Basic details' tab of the HIQ Universe Instance Manager. The interface includes a navigation bar with 'Basic details' and 'Users' details' tabs, and an 'Edit' button. The main content area is divided into four sections:

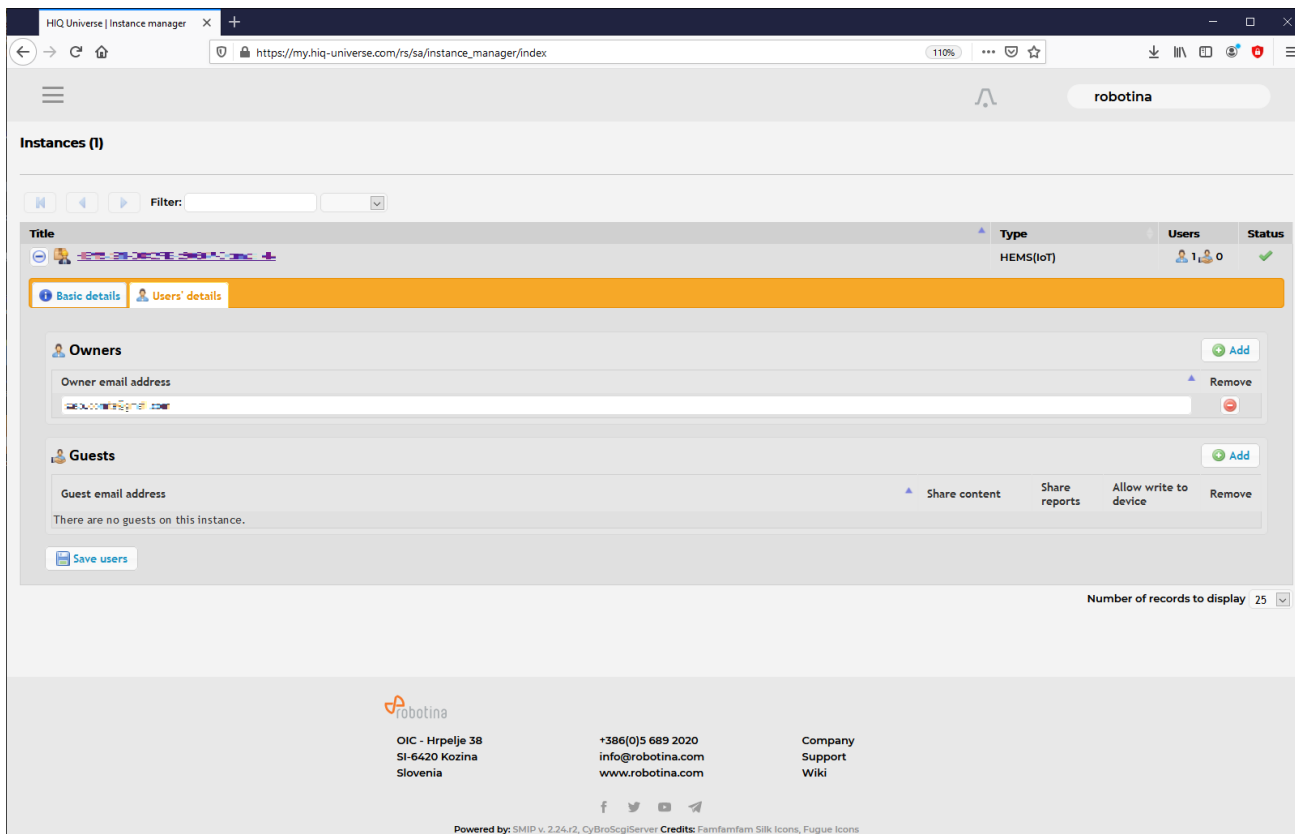

- Basic information:** Displays identification details such as Realm, Time zone, Ping time, Created (Sep 30, 2020 11:40:25 AM CEST), Modified (Oct 10, 2020 01:32:54 PM CEST), and Last accessed (Oct 10, 2020 12:30:29 AM CEST).
- Connections:** A message stating 'This instance does not have any connection.'
- Instance parameters:** A list of configuration parameters and their values, including user\_menu, IoT Linker serial number, Scripts Enabled (false), HEMS version (HEMS2), location\_name (time\_on\_site), location\_latitude (?), location\_longitude (?), Description, Maximum daily power (kW) (5), Maximum daily energy (kWh) (40), Maximum monthly energy (kWh) (500), Maximum production or consumption (W) (1000), Currency (EUR), Maximum daily value (EUR) (3), Maximum monthly value (EUR) (15), Maximum price (EUR) (1), icon (hems\_ikona), Type label (HEMS), and orig\_var (1).
- Instance controllers:** A table showing controller details.

Controller name	Ping time
	Error

Basic details displays information about the system. Here you can find:

- Basic info
- Connections
- Instance parameters
- Instance controllers

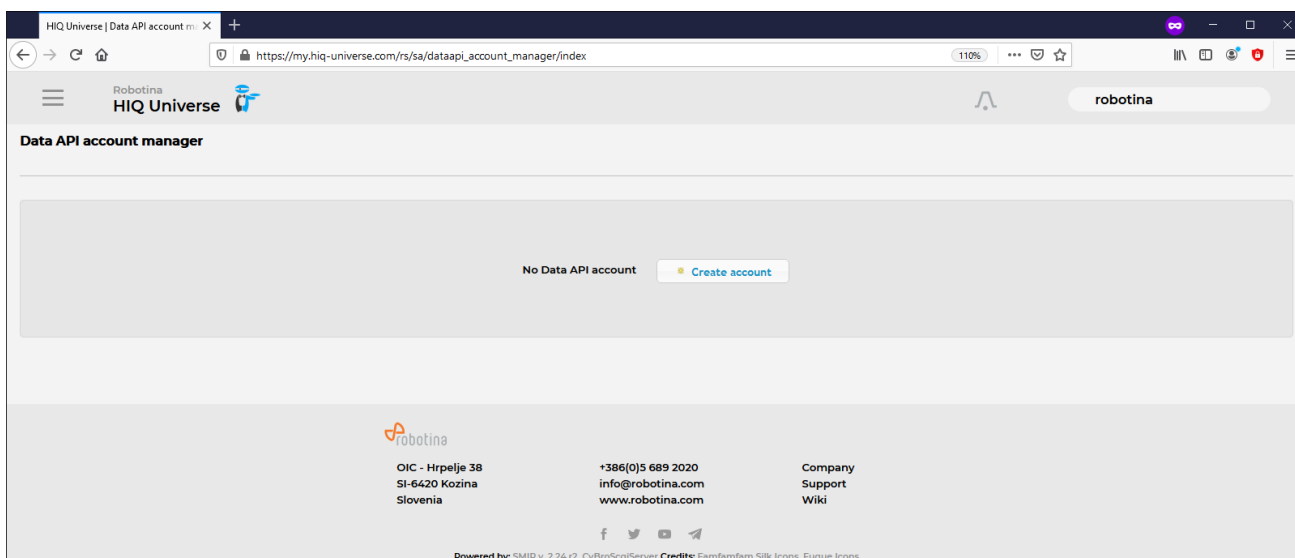

Parameters can also be changed with click on Edit button.

User's details shows all user that have access to this instance. Owners can be added or deleted and have control, overview and settings over this instance. Guest account can be added or removed and will have an overview and control of an instance. Guest can not change the settings.

Each instance can have max 1 owner and several guests.

## API key management

An application programming interface key (API key) is a unique identifier used for calling program with an API.

Clicking on Create account will create a new Data API key that can be renewed or deleted.

## Aggregation and overview of service providers installed systems
