# Single phase power-sensor

#### Single phase power-sensor

Model number:		PM1-E-D	
Connect to:		MC-230	
		RS485 power sensor bus A - B	
Mounting:		DIN rail, 1M, 18 mm	
Dimensions:		18 × 62 × 119 mm	
Used for measuring power and energy of			
✓	single-phase energy sources		
1	single-phase energy consumers		

# Applications

Digital multi-function power-sensor for single phase networks

### **Features**

- DIN rail mounting with direct connection up to 45A
- Compact design in a single module 18mm wide
- Seal-able cover(phase and neutral terminals)

# **General description**

The PM1-E-D series is an advanced single phase energy monitoring solution with built-in configuration push button and LCD data displaying, particularly indicated for active energy and other parameters metering and for cost allocation. Housing for DIN-rail mounting, IP51 protection degree, direct connection up to max 45A.

# **Technical specifications**
