150

# **Power sensor management**

Default address on all power sensor is 149. Available addresses for sensors are listed in table.

**Note**: adding of power sensor is supported one by one.

Address Power sensor posit
----------------------------

Grid

For both type of power sensor apply:

154,155,156 PV Wire It to communication bus,

157.15 for Battery Btorage and hold the push-button on the power sensor until it appears -SEt- on 161..167 play Consumer

- it should appear in configurator as new device, click on button **add** next to the source or consumer where sensor should be assigned,
- repeat procedure for next PM1-E-D or PM3-E-D.

**Note**: For PM3-E-D is possible to set address manually according to table, before adding it to communication bus:

# Without grid power sensor

• **Virtual grid PS** is an option if no grid meter is used. Power, current and energy will be calculated from other power sensors.

# **Delete power sensor**

### **One-phase sensors PM1-E-D**

- Make sure the "new device" is empty
- Press the button on power-sensor until **-Set-** appears on the display
- In HEMS Configurator press "del" button next to the sensor
- After a few seconds, the sensor should appear as the "new device"
- If desired, the sensor can be removed or it can be assigned to another device

#### **Three-phase power-sensor**

- Make sure the "new device" is empty
- In HEMS Configurator press "del" button next to the sensor
- After a few seconds, the sensor should appear as the "new device"
- If desired, the sensor can be removed or it can be assigned to another device
