

Robotina Charger Introduction

PLUG IN & GO

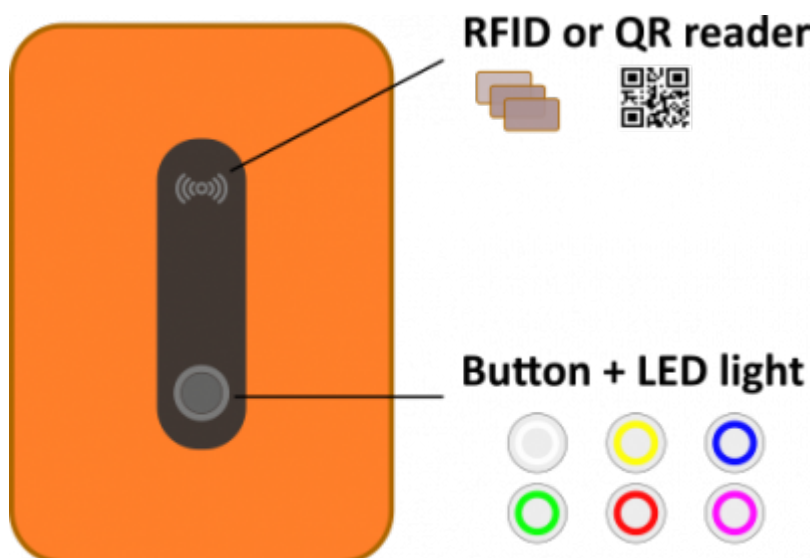

Simply connect vehicle to charge and unplug to drive.

Robotina Charger makes charging as easy as possible by enabling of charging using button on housing or by application on cloud.

BUTTON & LED on housing

- charging starts automatically as soon as vehicle is connected with power cable
- press button to stop charging, press again to restart
- press and hold button to activate priority charging
- LED light indicates charging status
- operating with button doesn't require active application

**Button on housing and "button" on cloud application share same functionality. It doesn't matter which one is used.*

RFID or QR

- authentication for users
- charging starts after authentication is successful
- RFID or QR reader could be installed on housing, both is not possible.

LOCKED

- disable unauthorized use of charging station
- locked is deactivated by authorized RFID card, key fob or by cloud application

ECONOMY CHARGING

- allows charging with a current set by user
- charging at low tariff only (depending on table set by user)
- charging by surplus energy only or in combination with grid power

PRIORITY CHARGING

- Utilize all available power to charge as fast as possible
- In case of *Dynamic load balancing* temporary suspends high-power loads to increase available power for charging simultaneously keeping total power below max allowed power

How to physically mount charger please see LINK (to be inserted).

How to operate with charger please see LINK (to be inserted)

LED indicator	Steady light	Flashing light
