2	Code type	Topic or a state of the state o
Click to select edited code ty (unlimited).	ype. Options ate L1 (level 1), L2 (level 2) or UL	
3	Access point limits	121: 19 000000000 227: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 000000000 277: 19 0000000000 277: 19 0000000000 277: 19 0000000000 277: 19 0000000000 277: 19 0000000000 277: 19 000000000000000 277: 19 00000000000000000000000000000000000
Click to enter count limits fo	r each access point.	
	nt in the local network, enter only in position ne allowed number of entries or 255 for	
4	Code activation date	
Set code activation date and immediately.	I time. Set all to 0 for the code that is active	
8	Code expiration date	
Set code expiration date and validity limit.	time. Set all to 0 for a code that has no	
6	Edit code commands	

1	Edited code		
[ search ] = Find setting	[ search ] = Find settings for "edit code".		
[ save ] = Saves the code being edited with all settings.			
[ clear ] = Clear all edit settings.			
[ delete ] = Delete edit code from the list.			
7 Codes list			
List of access codes on the controller. Clicking on the code picks up all the code values in the edit fields above.			

### **Settings**

1	Entry conditions	
Count limits: set count limits	s for L1 and L2; 0=not limited	
Disinfection: select if hand o	lisinfection is required	
Thermal scan: select if body	temperature scan is required s	
Reader: select if code reade	r is required	
Confirmation: select if confir	mation is required	
2	Entry detection settings	
Entry detection type: select	entry detection type	
Entry time-out: max time be	etween consecutive steps	
Confirmation time-out: max	time allowed for confirmation	
Block time-out: time for hi to	emperature or wrong code alert	
After all time-outs entry pro	cedure restarts.	
3	Code reader settings	
Access point ID: ID for built bigger Access control syster	in access point. Used when S Gate is part of m, if not, leave 0.	
Thermal scan timeout: set the temperature scan for the co	he time for which the system remembers the de user	
Access master code: set the	code for local codes management	
Send LAN code query: set to controllers on LAN	enable sending code queries to other access	
Process LAN code query: set LAN	t to process queries from other controllers on	
4	Auxiliary input settings	
AUX input type: set auxiliary button	input function to presence sensor or to call	
Presence / Call time-out: aux	x function timeout	
5	Gates settings	
Entry gate time-out: set entry gate signal timeout, 0=no entry gate		
Exit gate time-out: set exit gate signal timeout, 0=no exit gate		
6	Alarm settings	
Alarm duration: alarm active	e duration time	
Alarm beeper enabled: set t	o enable continuous beep during alarm	
Reset alarm on exit: set to r	eset alarm when exit is detected	
7	Hardware overview	
Control system overview		

1	Entry conditions		
Select [ Autodetect ] to find S Gate controller in LAN (when red Xes			
are displayed)			
8	Wireless devices management		
[]wireless management: set	to enable management of wireless devices		
first icon: wireless device pa	ired status (x=none, <b>✓</b> =paired)		
second icon: displaying wire	less signal strength		
third icon: wireless device operating as repeater (click to enable).			
[ - ]: delete wireless device			
[+]: add wireless device			
9	Controller date and time settings		
set S Gate controller date and time.			
10	Parameters management		
[init parameters ]:init	ialize all parameters to factory default values		
[save parameters ]: save all parameters to permanent memory			
[read parameters]: read all parameters from permanent memory
