Typical installations

Small shop, pharmacy

Requirements

- limited number of visitors
- one passage for access and exit
- automatic door
- required temperature measurement
- required disinfection

Installation

- SGate is installed at the entrance from the outside of the automatic door.
- Entry detection sensors are mounted on one of the sides or on an additional carrier depending on the physical layout of the SGate relative to the door..
- The automatic door opening signal is connected to the SGate and in parallel to the internal automatic opening sensor.
- The staff has a wireless button to confirm alarms or to open the door manually in case of exceptions.

Offices

Requirements

- number of visitors not limited
- one passage for access and exit
- automatic door
- required temperature measurement
- employees do not need to scan the temperature 4 hours after a successful scan
- required disinfection
- required authentication with code for employees and guests
- guests are exceptionally allowed to enter with confirmation of the reception (without code)

Installation

- SGate is installed at the entrance from the outside of the automatic door.
- Entry detection sensor is mounted on side of SGate or on an additional carrier depending on the physical layout of the SGate relative to the door.
- Receptionist has a wireless button or PC application to confirm alarms or to open the door manually in case of exceptions.
- Upon booking a meeting, each guest receives a QR code, which is time limited.
