

HIQ Building Automation

HIQ Building Automation is a system of integrated devices and software that is targeted for home, office and hotel automation.

The basic functionality that is implemented directly on module (such as HIQ-DC or HIQ-HC) ensures safe and reliable operation even when the local network is interrupted or broken. Advanced features implemented on HIQ-HC and direct communication for all applications - operation does not depend on an Internet connection. User friendly applications for complete HIQ system and all 3rd party systems.
